Introduction

Welcome to our manufacturing facility for medical disposables, where we are dedicated to creating durable, dependable, and reasonably priced medical disposables to suit the expanding need for medical supplies. Our business has a long history of being outstanding in the sector, and our team of knowledgeable experts is committed to offering cutting-edge solutions to satisfy the special requirements of our clients. We are aware of the crucial part medical disposables play in preserving the wellbeing and security of patients and healthcare professionals. To make sure that our goods satisfy the highest levels of performance and safety, we use cutting-edge production procedures and strictly adhere to quality control requirements.

We are thrilled to present to you our selection of premium medical disposables created to specifically address the demands of healthcare professionals. In order to enable healthcare workers give their patients the finest care possible, our product line offers a comprehensive choice of disposable medical equipment, including medicine cups, rectangle basins, sharp containers, specimen containers, male urinals, kidney trays, and more. Our company is dedicated to sustainability and ethical manufacturing techniques, and we make it a priority to reduce our environmental effect while boosting the value we offer to clients.

We are delighted to be a dependable partner in the healthcare sector at our medical disposable manufacturing business, and we look forward to meeting the demands of our clients with the same zeal and commitment that have distinguished our organization for a long time.

Advantages

- United Arab Emirates' strategic location and world-class infrastructure make supply chains easier. With uninterrupted infrastructure and world-class leadership, the nation has established an environment that allows businesses to run smoothly and quickly.
- We provide consumers with prices that are competitive globally.
- Each product is designed with great care and attention, with the help of a skilled team's collaborative consultation.
- Machines built to European standards have been installed for the finest outcomes and productivity.

Certificate

SYSTEMS CERTIFICATION INTERNATIONAL
Leaders in ISO Management System Certification

CERTIFICATE

This is to Certify that the
Quality Management System
of
STERILE MANUFACTURING LLC

Certificate of Compliance

CE

We hereby declare that the technical file of product complied with the requirement of directive Council Directive on Medical Devices 93/42/EEC as Amended 2007/47/EC

Certificate No.: CE-3650

Manufacturer Name : STERILE PLASTIC MANUFACTURING L.L.C
Address : AL BAHIYA, JURF3, AJMAN, UNITED ARAB EMIRATES.
Product Name : KIDNEY TRAY, SPECIMEN CONTAINER, MEDICINE CUP, RECTANGULAR BASIN, SHARP CONTAINER, MALE URINAL, HDPE BOTTLES.

The Certification body has performed an audit of the above product quality system covering the design, manufacture and final inspection of the certified product. The quality system has been assessed, approved and is subject to continuous surveillance according to Directive Council Directive on Medical Devices 93/42/EEC as Amended 2007/47/EC.

This certificate is issued under the following conditions:

1. It applies only to the quality system maintained in the manufacture of above referenced models and it does not substitute the design or type examination procedures, if requested.
2. The certificate remains valid until the manufacturing conditions or the quality systems are changed.
3. The certificate validity is conditioned by positive results or surveillance audits.

The CE mark as shown above can be used, under the responsibility of the manufacturer, after completion of an EC Declaration of conformity and compliance with all relevant EC Directives. The statement is based on a single evaluation of one sample of above mentioned product. It does not imply an assessment of the whole production.

Validity of this certificate can be verified at www.ukcertifications.org.uk/verify

Date of Certification 08 th November 2022
1st Surveillance Audit Due 07 th November 2023
2nd Surveillance Audit Due 04th November 202 4
Certification Expiry (subject to the company maintaining its system to the required standard) 04th November 2025

PRODUCTS

Male Urinal 1000 ml

Material

Male urinals have been a crucial component of patient care for collecting urine, and we produce them using the best raw materials available that are created by top manufacturers.

Design

The product contains markings on both sides, which makes obtaining measurements easy. The caps have been designed so that leaks won't happen in the case of an accidental drop, and the thickness and general quality make it comfortable to handle.

Stool Container

60 ml with individual wrapping

Material

The specimen stool container is a product that needs careful handling because it is used to collect stool for sample testing.

We picked polypropylene since it is a durable material that can withstand chemical wear.

Never do we use any poor quality supplies because doing so alters the outcome.

Design

Our stool containers are marked with markings that display both ounce and milliliter marker.

The caps are intended to be leak-proof under normal conditions.

To avoid contamination, each bottle is individually packaged.

Sharp Container

5 QT

Material

In order to withstand the sharp objects, sharp containers are built of recyclable polypropylene with exceptional impact strength. Additionally, in the case of an unintentional fall, the material is resistant to breakage.

Design

Compared to regular containers, there is more usable space.
To maximize the usable volume, widen the body. Reduced Plastic Use Intended To Have A Smaller Effect On The Environment.
Designed To Withstand An Unintentional Spill.
Suitable For a Variety Of Wall Mounts.

Sharp Container

3 Litre

Material

Sharp bins are manufactured of adaptable polypropylene homopolymer that has been combined with additives for strength and color.

The product exhibits excellent toughness and stiffness.

Tensile modulus: 1550 mpa

Tensile stress at yield: 34.5 mpa

Charpy impact strength notched:3.5kj/m²

*Measured on injection Moulded specimens all to ISO: 1873 - 2

Design

Sharp containers are designed for simple use and disposal.

The lid's construction makes it possible to close it completely with just one press.

Bins include handles to make moving them easier.

A wall hanging hook is also included for mounting.

Code: SH3YB

Rectangular

Wash Basin 5 Litre

Material

Basins are a crucial component of medical disposables, and we do create them from polypropylene that is of the highest quality.

These materials can be recycled if necessary, reducing our influence on the environment.

The colors and other chemicals used are carefully selected to meet medical standards.

Design

The user may utilize the wide body design's convenient handling and usage space. The item is convenient and does not collapse when handled due to the greatest amount of care, which is ideal for medical facilities where the highest level of care is necessary. The basins have a maximum volume capacity of 5 liters.

Kidney Tray

Disposable 700 ml

Material

These trays are resistant to most chemicals and produced from 100% pure polypropylene, which is supplied by top manufacturers. The product is reliable since the raw material may be recycled to have a smaller environmental impact. It can also handle high temperatures and stress.

Design

The mouth space has been expanded since we paid close attention to detail during design, ensuring that use will be simple and straightforward. The design of the thickness ensures that it is still user-friendly and resists bending.

MEDICINE CUP

30 ml

Material

The medicine cups are used to provide medicines to patients, and each cup is crafted of only the highest quality plastic.

Due to the need for a very clean environment during production, automated robots are used.

There are measurements on each individual cup in cc and ml.

Design

Each individual cup is marked in cc and ml up to 30 ml.

Since high clarity materials are used in manufacture, the level of transparency is at its highest.
